EDUCATION

Carnegie Mellon University
M.S. in Electrical and Computer Engineering
Sep 2026 - Present

Kean University
B.Sc. in Computer Science — Aug 2022 - Jun 2026

- Overall GPA: 3.859/4.000; Minor: Mathematical Sciences
- Honors: Zhejiang Province Government Scholarship; Dean's First-class Scholarship; Dean's Scholarship for Research and Innovation.

SELECTED PUBLICATIONS

PROFESSIONAL EXPERIENCE

Institute of Software, Chinese Academy of Sciences
Research Intern — Jul 2024 - Sep 2024

- Implemented a data pipeline and token-level explanations for language models using Layer-wise Relevance Propagation (LRP) and DeepLIFT.
- Compared attribution methods on general and medical text examples through token-relevance visualizations.

RESEARCH EXPERIENCE

Developmental Learning for Multimodal Models — Nov 2025 - Mar 2026

- Surveyed developmental learning for multimodal models; contributed to a framework for grounding, supervision inference, memory, and continual adaptation.

LLM Reliability and Rejection Behavior — Nov 2024 - May 2025

- Reviewed fine-tuning, RAG, and RAFT across five scholarly databases; compared rejection behavior, hallucination mitigation, cost, and domain adaptability.

Language Models for Cognitive Screening — Feb 2024 - Jul 2025

- Built a Chinese speech-to-text pipeline for cognitive screening, including audio normalization and transcript correction.
- Compared prompting, fine-tuning, and LoRA across Llama-3, Gemma, and Qwen under different quantization settings.
- Evaluated with subject-level five-fold cross-validation; the study achieved approximately 0.86 accuracy and F1 with 4-bit QLoRA.

RESEARCH INTERESTS

- Multimodal Large Language Models; Computer Vision; Reinforcement Learning; Reliable Large Language Models.
